

Introduction to Data Science and AI Summer Camp

Hosted by MIDAS & the Michigan Science Center

Camp Dates: July 11th – 15th, 2022 (M-F; 9am-5pm approximately)

Location: Michigan Science Center & University of Michigan Ann Arbor Campus
(Student transportation to and from camp and Ann Arbor will be provided)

Cost: \$25 to register (Students will receive a \$25 gift card upon program completion)

Student meals will be provided each day

What will students learn?

Through lectures, hands-on activities and group projects led by University of Michigan professors and data science students, campers will learn:

- What is data?
- How do we “visualize” data?
- What is data analytics?
- What can data tell us about ourselves and our society?

During this week-long camp; students will also have the opportunity to tour the University of Michigan campus and research labs, speak with college admissions representatives, meet University of Michigan students studying data science, and network with a group of their peers.

See what past data science campers thought of this experience by watching [this video](#).

Apply today!

MIDAS is seeking Detroit high school rising juniors and seniors who demonstrate a need and interest in a low-cost STEM learning opportunity. Students in demographic groups who are under-represented in STEM fields are particularly welcome! Please apply for this opportunity at the link below.
